Descriptions

Getting Started with SMART Boards

The SMART Board interactive whiteboard turns your computer and projector into a powerful tool for teaching, collaborating and presenting. Whenever you teach, the SMART Board interactive whiteboard helps you save time, increase interactivity and improve communication. Come and discover the instructional possibilities of SMART Board Technology!

Designing Elementary Interactive Lessons with SMART Notebook Software (Grades K-5)

Take your SMART Board expertise to the next level and design (Grade K-5) lessons that are content rich and interactive. Participants in this workshop will learn how to add interactive features to lessons and then create their own lessons using the SMART Notebook. Bring an idea for a lesson, incorporate interactivity into the lesson and it will be ready to take back to the classroom.

Designing Secondary Interactive Lessons with SMART Notebook Software (Grade 6-12)

Take your SMART Board expertise to the next level and design (Grade 6-12) lessons that are content rich and interactive. Participants in this workshop will learn how to add interactive features to lessons and then create their own lessons using the SMART Notebook. Bring an idea for a lesson, incorporate interactivity into the lesson and it will be ready to take back to the classroom.

Engaging Elementary Learners with SMART Boards (Grades K-5)

Using a SMART Board in the (Grade K-5) classroom ensures that lessons are highly visual, interactive, and will engage and hold students' attention. Come and explore classroom-tested, content specific lessons and activities that incorporate SMART Boards in Elementary classroom instruction. This workshop will provide participants with a host of resources and hands-on ideas for integrating this exciting and interactive technology. **Come prepared** with a specific lesson idea to work with as you explore the many resources available to you.

Engaging Secondary Learners with SMART Boards (Grades 6-12)

Using a SMART Board in the (Grade 6-12) classroom ensures that lessons are highly visual, interactive, and will engage and hold students' attention. Come and explore classroom-tested, content specific lessons and activities that incorporate SMART Boards in Secondary classroom instruction. This workshop will provide participants with a host of resources and hands-on ideas for integrating this exciting and interactive technology. **Come prepared** with a specific lesson idea to work with as you explore the many resources available to you.

SMART Response (aka Senteos)

The SMART Response Interactive Response System provides a direct connection between you and your students. You no longer have to wonder if students understand what you've taught them. They can tell you with the click of a button. With the SMART Response you are able to quiz, poll, assess and gauge student understanding with the power of SMART's Notebook software. The SMART Response Question Manager is a fully integrated arm of Notebook software thus offers both potential and simplicity to teachers using the SMART Board interactive whiteboard. Come to this workshop and see firsthand the power of this student response system.

SMART Boards Games

Games are fun with a purpose; they provide feedback to the learner and the teacher, motivate learners, accelerate learning and give you choices for your classroom. A SMART Board is "THE TOOL" to use to facilitate games in the classroom. In this workshop, you will have the opportunity to explore interactive SMART Board game templates, find resources for games online and create games specific to your subject and classroom. Please come prepared with a topic and questions so that you can create games to engage your students.
